

## Blue Air Safety Instructions

Ladies and gentlemen,  
Welcome on board!  
We've got some safeties for you.  
As you soon travel,  
You have to know what to do  
So' please listen us!

Before we take-off  
Please fasten your seat belts,  
Stow your tray tables,  
Make sure that the backrest of your seat is in the upright position.  
Personal electronic devices must be turned off or in flight mode  
Place any bag, coat or belonging inside the overhead bins  
Or under the seat.

Remember you're flying  
So smoking is strictly forbidden.

If cabin pressure changes,  
The oxygen mask will drop.  
Pull down the nearest mask  
Place it over your mouth and nose.  
Be sure to adjust your own mask before helping others!  
But most importantly, remain calm and breathe normally.

Life jackets are under your seats.  
Put one on.  
Fasten the strap tightly around your waist,  
Pull down the red tab in front to inflate the life vest  
And blow into the rubber tube.  
Children's life vests will be activated inside the plane.  
Adults must inflate their vests only after leaving the aircraft.

The emergency lights along the aisle will direct you to the nearest exit.  
All exits are clearly marked with the EXIT sign.  
Safety instructions cards are located in the seat pockets before you.  
Please read them carefully before take off.

Have a great flight and  
**Thank you for flying Blue Air!**
